SUMMARY

Dedicated software engineering student with extensive hands-on experience building production-ready, full-stack applications. Specializing in the MERN stack, Django, and Next.js, I focus on delivering efficient, scalable systems from concept to deployment. Driven by daily algorithmic problem-solving, I write clean, maintainable code and prioritize clear communication to deliver reliable solutions for frontend, backend, and full-stack roles

EDUCATION

Bachelors in Software Engineering

Addis Ababa University

09/2024 – Present
Addis Ababa, Ethiopia

Summer Camp Training Program (CTC 5th Batch)

Information Network Security Administration (INSA)

07/2026 – 09/2026
Addis Ababa, Ethiopia

- Completed an intensive three-month technical summer camp focused on technology and development.
- Received structured, hands-on training covering software development principles, network security fundamentals, and technical problem-solving.

SKILLS

Full-Stack Development

E-commerce Websites

Frontend

React, Next.js, Tailwind CSS

Databases

PostgreSQL, MongoDB

Web Application Development

Languages

JavaScript, TypeScript, Python, Java

Backend

Node.js, Express, Django, NestJS, REST APIs

Applied Artificial Intelligence

LLM Integration (Groq, Llama), Computer Vision Applications, AI API Implementation, Prompt Engineering

CERTIFICATES

Programming Fundamentals

Introduction to Universal AI

Certificate in Introduction to Universal AI | MIT

Open Learning (October 2026)

Android Developer Fundamentals

Full-Stack Software Engineering Internship

Developed SmartBiz ERP Lite, an offline-first Progressive Web Application for business pricing and inventory management using Next.js, NestJS, and PostgreSQL.

LANGUAGES

- Oromic
 - Amharic
- English
 - Arabic

COURSES

Introduction to Universal AI <i>MIT Open Learning</i> • Completed foundational modules covering artificial intelligence theories, concepts, and problem-solving approaches. • Gained practical knowledge in Large Language Models, Deep Learning, and Generative AI. • Learned to interpret AI outputs and evaluate AI applications across real-world contexts.	2026 – Present Online
Software Development and Competitive Programming (DSA) <i>Nexus Tutorial</i>	10/2025 – 01/2026 Addis Ababa, Ethiopia

CUSTOM

Continuous Development <i>Competitive Programming & Algorithm Optimization</i> Maintain a rigorous daily practice of solving complex data structure and algorithmic challenges across LeetCode, Codeforces, and HackerRank. This consistent discipline ensures that writing highly optimized, structurally sound, and efficient code is a foundational habit, directly translating into faster and more reliable production systems.

PROJECTS

Gebere Vision AI <i>AI-Powered Agricultural Diagnosis Platform & Telegram Bot</i> • Engineered a live AI-powered Telegram bot providing instant crop disease diagnosis with multilingual support for Amharic, Afaan Oromoo, English, and Arabic. • Integrated Groq AI's llama-4-scout-17b vision models for high-speed image analysis, building a scalable backend with Node.js, Express, and Supabase PostgreSQL. • Implemented a Human-in-the-Loop verification network to ensure diagnostic accuracy and deployed the full system via Railway cloud hosting.	2025 – Present
AAU Café Management System Engineered a real-time campus ordering system utilizing JavaScript and PostgreSQL.	04/2026 – 04/2026
Tutor Marketplace Built a comprehensive student-instructor platform featuring complex booking and matching logic, developed using React, Node.js, and MongoDB	02/2026 – 03/2026
Ethio Bucks Developed a transaction-heavy financial backend built for scale and reliability. Deployed the system utilizing Django and PostgreSQL	10/2025 – 01/2026
